

Clinical Skills Competency

PT / PTA

Therapist: _____ Date: _____

Skill	Competent	Not Competent/ re-educated	Eval Method	Initials of Reviewer
Knowledge of:				
Vital Signs monitoring: Pulse			O D T	
BP			O D T	
Pulse Ox			O D T	
Therapeutic Ex's: PROM			O D T	
AROM			O D T	
RROM			O D T	
Endurance			O D T	
Bed Mobility Training techniques (tech)			O D T	
Transfer Training tech: Stand Pivot			O D T	
Sliding Board			O D T	
Neuromuscular Re-ed: Balance			O D T	
Coordination			O D T	
Gait Training			O D T	
Assistive Devices: Fit/Adjustment			O D T	
Safety			O D T	
Infection Control			O D T	

Reviewer: _____

Eval Method Key: O = Observation; D = Demonstration; T = Written Test

Directions for Competency Completion

PTA's can be reviewed by PT or PTA

PT's can only be reviewed by PT

If discipline is not available, please contact CPT office

If therapist is Competent, Check box in Competent column

If therapist is not Competent, Re-educate and check Not Competent / Re-educated Column

Circle the Evaluation Method used to determine competency:

O = Observation

D = Demonstration

T = Written Test

If at any time a task was observed to be completed correctly during normal course of treatment with patients, it can be noted as competent. You do not need to do a specific test with the therapist.

For Infection Control - completion and passing of the annual OSHA Competency quiz is sufficient to mark therapist as competent.

Please ask Anisa from Credentials if therapist passed OSHA quiz.

Observation can also be done but is not necessary.

Initial each skill and then sign competency sheet.
