

Today's therapy session was completed via telehealth. A consent for telehealth was obtained prior to the session. Due to the COVID-19 pandemic, staffing strategies were unsuccessful to complete today's session via a traditional in-person format, so telehealth was provided in order initiate/avoid a delay of care.

The onsite assistant during today's session who was present to provide physical assistance during the session was: FIRST LAST NAME, credentials

The patient session was performed in: LOCATION (patients room, therapy gym, a private location within the facility, etc..)

The location of the distant site therapist was at another CPT clinic.

There were limitations to the session due to the telehealth format which include:

- an abbreviated evaluation due to inability for the distant site clinician to provide hands-on assistance or assessment
- there were technical difficulties with audio/visual connection

-or-

There were no limitations to the session due to the telehealth format.
